

26 August 2008

To the parent of: _____

Dear parent,

At Dallas County Public Health we have done our annual review of immunization records for 11-18 year olds. Our records indicate that your child is due for the following immunizations:

Td/TDaP Varicella Hep B Meningococcal HPV(females only)

Please see the attached sheet for recommendations for immunizations as well as a brief summary about each immunization. It is through immunizations that disease type illnesses have decreased throughout the years. Immunizations protect your child, other children and the community.

If your child has **already received** the recommended immunizations please contact our office so that we can update your child's records. You can contact us by phone at (515) 993-3750 or (515) 993-2483. You can also fax a current copy of your child's immunization record to (515) 993-4949 Attn: Lynn Royer with "update" on the cover sheet.

If your child has **not received** the recommended immunizations please contact your current immunization provider. If you would like receive your immunizations at Dallas County Public Health Nursing Services please contact us at (515) 993-3750 or (515) 465-2483 to schedule an appointment.

We provide vaccinations for a donation only to those children who qualify. We provide vaccinations to children under the age of 18 that have no medical insurance, have Medicaid or have an insurance that does not cover the cost of vaccinations. Please contact our office with any questions related to this program.

I appreciate your time in reading and responding to this letter.

Thank you,

Lynn Royer, RN
Dallas County Public Health Nurse
